INTRODUCTION

This issue of Statistics of Communications Common Carriers contains financial and operating data for the year 1968. The information was taken principally from annual and monthly reports filed by the carriers with the Federal Communications Commission. This publication has been issued annually since 1939. Previous to 1957 it was titled "Statistics of the Communications Industry in the United States."

All communications carriers engaged in interstate or foreign communication service, except those that operate solely through connection with the facilities of an unaffiliated carrier, are subject to all the common carrier provisions of the Communications Act of 1934, as amended.

Subject telephone carriers which operate telephone exchanges and have operating revenues in excess of \$1,000,000, and those which do not operate telephone exchanges but operate to overseas points or in the Maritime radio services and have annual operating revenues in excess of \$50,000 are required to file annual reports with the Commission.

Telegraph carriers which have annual operating revenues in excess of \$50,000 are required to file annual reports. Companies controlling communications common carriers whose annual revenues exceed \$2,500,000 are also required to file annual reports.

Annual reports for the year 1968 were filed by 58 telephone carriers, 7 telegraph carriers and 10 controlling companies. An annual report was also filed by the Communications Satellite Corporation.

Telephone carriers whose annual operating revenues exceed \$1,000,000 and telegraph carriers having annual operating revenues exceeding \$250,000 are also required to file condensed monthly reports of financial and operating data.

Part I of this volume contains information concerning all reporting carriers.

Part II contains financial and operating data relating to telephone carriers. Summaries for all reporting telephone carriers and for the Bell companies are included, as well as data by individual carriers. "Bell companies," as used in this publication, represents the American Telephone and Telegraph Company, its principal telephone subsidiaries, and The Cincinnati and Suburban Bell Telephone Company and The Southern New England Telephone Company.

It is estimated that, on the basis of assets and of revenues, the telephone carriers reporting to the Commission as fully subject carriers represent about 90 percent of the telephone industry in the United States.

The gross book cost of communication plant of the reporting telephone companies was \$48,866,094,000 as of December 31, 1968 as compared with \$44,809,744,000 as of December 31, 1967, an increase of 9 percent. The total operating revenues reported by these carriers for the year 1968 were \$15,096,833,000 as compared with \$13,870,405,000 for the year 1967, an increase of 9 percent; and the total operating expenses, excluding taxes, amounted to \$9,034,289,000 as compared with \$8,332,090,000 for the preceding year, an increase of 8 percent.

In compiling summary figures for telephone companies, duplications between the Bell companies with respect to securities, receivables, payables and items of income and expense, except in minor instances, have been eliminated.

Data relating to the larger non-subject telephone carriers, supplied voluntarily by those carriers, are shown in Table 17 of this issue.

Part III of this volume contains data relating to domestic and overseas telegraph carriers. The telegraph carriers reporting to the Commission, along with record communications business reported by telephone companies, represent practically all of the telegraph industry in the United States.

The gross book cost of communication plant of the domestic telegraph carrier amounted to \$916,712,000 as of December 31, 1968, as compared with \$871,425,000 as of December 31, 1967, an increase of 5 percent. The operating revenues of the domestic telegraph carrier for the year 1968 amounted to \$358,202,000 and the operating expenses, excluding taxes amounted to \$313,635,000 as compared with \$334,983,000 and \$296,661,000, respectively, representing increases of 7 percent in revenues and 6 percent in expenses as compared with the year 1967.

The gross book cost of communication plant of overseas telegraph carriers was \$282,412,000 as of December 31, 1968, as compared with \$250,722,000 as of December 31, 1967, an increase of 13 percent. The operating revenues of the overseas telegraph carriers for the year 1968 amounted to \$153,547,000 and the operating expenses, excluding taxes, amounted to \$118,088,000 as compared with \$132,427,000 and \$102,214,000, respectively, representing increases of 16 percent in both revenues and expenses as compared with the year 1967.

Part IV of this volume includes the balance sheet and income statement of the Communications Satellite Corporation.

Part V of this volume shows the intercorporate relations of all the subject carriers reporting to the Commission and the controlling companies.

() Indicates reverse item.

- 1/ Represents the excess of charges to income tax expense by some companies who, for tax purposes but not for accounting purposes, used liberalized depreciation methods recognized by Section 167 of the Internal Revenue Code along with "normalization" tax accounting, over credits to income tax expense by other companies who in past years used liberalized depreciation for tax purposes along with "normalization" tax accounting but later either ceased using liberalized depreciation or switched to "flow through" tax accounting and are amortizing to income tax expense the previously accumulated provisions for future taxes.
- 2/ Western Union Telegraph Co. had an estimated net reduction in Federal income tax expense of \$4,488,000 arising from the utilization, for income tax purposes but not for accounting purposes, of a liberalized depreciation method recognized by Section 167 of the Internal Revenue Code of 1954. It also had an estimated net increase in Federal income tax expense of \$75,000 arising from the use for tax purposes in prior years of five-year amortization authorized under Section 168 of the Internal Revenue Code of 1954. The accumulated net balance at December 31, 1968, of liberalized depreciation and five-year amortization income tax differentials accounted for on the "flow through" basis was \$49,831,000.
- 3/ Represents credits to income tax expense by ITT World Communications, Inc., which prior to 1961, for tax purposes but not for accounting, used liberalized depreciation methods recognized by Section 167 of the Internal Revenue Code of 1954 along with "normalization" tax accounting. The provisions in the accounts for deferred taxes are being amortized in equal amounts over ten years commencing in 1962. ITT World Communications Inc., RCA Global Communications, Inc. and Western Union International, Inc. had for the year 1968 net reductions in Federal income tax expense of \$1,043,000, \$1,839,000 and \$552,000, respectively, arising from the utilization, for income tax purposes but not for accounting purposes, of liberalized depreciation which was accounted for on the "flow through" basis. The accumulated amounts of liberalized depreciation income tax differentials accounted for on the "flow through" basis since that basis was adopted at various dates were \$2,979,000, \$8,971,000 and \$1,453,000 for the three companies in the same order.
- 4/ Western Union Telegraph Co. was unable to use its investment tax credit applicable to 1968 of approximately \$5,600,000 due to the absence of tax liability.

Notes.--Carriers reporting annually to the Commission include those subject to all the common carrier provisions of the Communications Act of 1934, as amended, which have annual operating revenues in excess of \$1,000,000 and those which operate to overseas points or in the Maritime radio services and have annual operating revenues in excess of \$50,000. Data pertaining to the three exclusively Maritime radio carriers reporting are not included in the statistical tabulations in this volume except in Table 35. Carriers having annual operating revenues in excess of \$1,000,000 are also required to file monthly reports of revenues and expenses.

In addition to the carriers listed in this table data were obtained from certain of the larger non-subject telephone carriers and are tabulated in Table 17.

* Bell Company. "Bell companies" as referred to in this volume include the American Telephone and Telegraph Co., its principal telephone subsidiaries, and two associated companies, The Cincinnati and Suburban Bell Telephone Co. and the Southern New England Telephone Co.

Engaged in Maritime radio service only.

1/ ITT Cable and Radio, Inc.--Puerto Rico merged into All America Cables and Radio, Inc. May 22, 1968.

2/ General Telephone Co. of Upstate New York, Inc. acquired the Orange County Telephone Co. on May 16, 1968.

3/ The business of the Southern Bell Telephone and Telegraph Co. pertaining to Alabama, Kentucky, Louisiana, Mississippi, and Tennessee, as of July 1, 1968, was transferred to a newly formed company, South Central Bell Telephone Co.

^{1/} Includes 457,400 service telephones (non-company telephones for which switching service is provided.)^{2/} Households with service are the sum of residence main, apartment house PBX and residence service main telephones, and other residence PBX systems. There tends to be a slight overstatement of the proportion of households with telephone service.^{3/} Data not available.

Source: Annual reports filed with the Federal Communications Commission. In a few instances data from unofficial sources or estimates were used.

Note.--Intercompany duplications between the Bell companies have been eliminated, except profits and losses on intercompany transfers of plant.

* The difference in the number of carriers shown for each year is due to mergers, reclassifications, etc. In 1951 and 1965 revisions in the Commission's rules regarding reporting requirements resulted in a smaller number of reporting carriers.

¹/ Includes local service revenues, toll service revenues, and miscellaneous revenues.²/ Includes company, service and private line telephones.³/ Figures are partly estimated. Local calls after 1950 include only completed calls. Toll calls include both completed and uncompleted calls for all years. The numbers of calls have not been adjusted to reflect the reclassification of calls over the years from "toll" to "local" due to the enlargement of local calling areas.⁴/ The numbers reported for the years 1935-1942, and for 1961-1968 are as of the end of December. The numbers reported for the years 1943-1960 are as of the end of October.⁵/ Represents total compensation for the year divided by the number of employees.

Note.--For corresponding data regarding overseas communications services of telegraph carriers and TV program transmission revenues of all carriers see Table 22. Talex service was offered by telegraph carriers only.

1/ Private line revenues include the following amounts (some partly estimated) received from overseas telegraph carriers for the rental of overseas communications channels used by the lessees of the services offered by them. The year 1960 was the first in which there were any significant amounts received from the overseas telegraph carriers. The reduction in the amount of rentals received after 1963 is the result of the acquisition by indefeasible right of user of channels in telephone cables and the acquisition of ownership interests in telephone cables by certain overseas telegraph carriers. The noticeable reversal of this trend in 1967 is due to the largest telephone carrier, in particular, adopting a policy of preferring the less permanent lease practice over a continuation of sales of interest to meet traffic growth needs of the telegraph carriers.

In addition, until Sept. 16, 1965, Hawaiian furnished RCA Global Communications, Inc. two telegraph channels in the telephone cable between Honolulu and San Francisco as part payment (in addition to \$12,000 per month) for the latter maintaining for Hawaiian standby radiotelephone facilities in Hawaii. The bulk of the overseas private line revenues, except those from the overseas telegraph carriers, are from agencies of the U.S. Government.

2/ Includes the carrier's share of the overseas service charges attributable to the landline haul in the United States.

3/ The first transoceanic cable was placed in service September 25, 1956.

4/ Operations of ITT Cables and Radio, Inc.--Puerto Rico were transferred to All America Cables and Radio, Inc. as of May 22, 1968. Prior to 1965, ITT Cables and Radio, Inc.--Puerto Rico was Radio Corporation of Puerto Rico.

5/ The first Virgin Islands cable was completed in December, 1964. ITT Communications, Inc.--Virgin Islands commenced operations December 23, 1964. Prior to that date the Virgin Islands--U.S. service was via radio between Virgin Islands and Puerto Rico and between P.R. and U.S. via the Puerto Rico cable.

6/ The first Hawaiian cable, in which the Hawaiian Telephone Co. owned an interest was placed in operation Oct. 9, 1957. Prior to that date the Hawaiian-U.S. service was via radio and the Hawaiian radio facilities were supplied by RCA Communications, Inc.

7/ The telephone cable between U.S. and Puerto Rico was placed in operation Jan. 26, 1960.

Note.—Data shown in this table are compiled from AT&T's response to Part 43.61 of the Commission's Rules and represents all overseas message telephone traffic which either originated or terminated in the continental United States, excluding Alaska. Beginning with the year 1968 overseas telephone data as reported herein excludes data on calls which transited through the continental United States over the facilities of the telephone company, which have been included in all prior years and therefore such years' data are not comparable. In 1968, AT&T reported that it handled some 4,114,000 transit minutes of telephone conversations, or about 3.6 per cent of the total overseas minutes handled. These data vary somewhat from the message counts and revenues shown in Table 13. The data in such table contains substantial revenue reported by four carriers from calls handled jointly with AT&T, principally to or from Hawaii, Puerto Rico, Virgin Islands and Cuba. It also contains a relatively small number of calls, and revenues from calls, which AT&T did not participate in handling.

Note:--This compilation includes data of carriers subject to all the common carrier provisions of the Communications Act of 1934, as amended, which have annual operating revenues in excess of \$1,000,000.

- () Deficit or other reverse item.
- 1/ The intercompany duplications between the Bell companies with respect to securities, receivables, payables, and items of income and expense, except in minor instances, have been eliminated. In the elimination of intercompany security holdings, the difference between the aggregate book cost as reported by the carriers owning such securities and the reported par or stated value, including ascertainable discounts and premiums applicable thereto, has been applied as a net reduction of unappropriated earned surplus, or in the case of the investment of American Telephone and Telegraph Company in Pacific Northwest Bell Telephone Company, against other capital surplus insofar as the latter is applicable to the intercompany holding.
- 2/ Includes the American Telephone and Telegraph Co., its principal telephone subsidiaries, and two associated companies, The Southern New England Telephone Co. and The Cincinnati and Suburban Bell Telephone Co.
- 3/ Does not include \$1,060,996,000 representing proportionate interest in the net assets of subsidiaries not consolidated in excess of book cost of the investments in such subsidiaries, which is added to book cost of investments and to surplus in consolidated balance sheets published by the Bell System.
- 4/ Reflects a reduction of \$2,633,388 on account of netting receivables from and payables to certain affiliated and other companies shown separately on the books of the two Departments.
- 5/ Attributable principally to investment credits on plant and equipment purchases of Bell Telephone Laboratories, Inc.
- 6/ Does not include \$106,503,000 proportionate interest in earnings (after dividends) of subsidiaries not consolidated, which is included in other income in consolidated income statements published by the Bell System.
- 7/ Includes credit items, "Telephone franchise requirements" and "Expenses charged construction."
- 8/ Includes only phantom circuit on transposed aerial wire, miles of phantom circuit on wire in cable not being available.
- 9/ Data were not reported for Non-Bell companies.
- 10/ The number of lines reported for Pacific Telephone & Telegraph Co. include those of Bell Telephone Co. of Nevada.
- 11/ Partly estimated.
- 12/ All the base station transmitters used in Domestic Public Land Mobile Service in one mobile service area are considered collectively as one base station.
- 13/ Complete data not available.
- 14/ Does not include data for various types of group insurance financed jointly by the companies and the participating employees. During 1964 the Bell companies established trust funds to provide for certain death benefits to beneficiaries of active and retired employees. During 1968 benefits paid from these funds amounted to \$5,893,573. They are not reflected in data shown here.

() Deficit or other reverse item.
 1/ Includes credit items, "Telephone franchise requirements" and "Expenses charged construction."
 2/ Includes only phantom circuit on transposed aerial wire; sales of phantom circuit on wire in cable not available.
 3/ Partly estimated.
 4/ All the base station transmitters used in Domestic Public Land Mobile Radio Service in one mobile service area are considered collectively as one base station.

Does not include data for various types of group life insurance financed jointly by the companies and the participating employees. During 1962 the Bell companies established trust funds to provide for certain death benefits to beneficiaries of active and retired employees. Benefits paid from these funds in 1963 are not reflected in amounts shown.

() Deficit or other reverses item.

1/ Includes credit items, "Telephone franchise requirements" and "Expenses charged construction."

2/ Includes only phantom circuit on transposed aerial wire, miles of phantom circuit on wire in cable not available.

3/ Partly estimated

4/ All the base station transmitters used in Domestic Public Land Mobile Radio Service in one mobile service area are considered collectively as one base station.

5/ Does not include data for various types of group life insurance financed jointly by the companies and the participating employees. During 1964 the Bell companies established trust funds to provide for certain death benefits to beneficiaries of active and retired employees. Benefits paid from these funds in 1968 are not reflected in amounts shown.

(1) Deficit or other reverse item.

1/ All America Cables and Radio, Inc. became a telephone carrier subject to the jurisdiction of the Commission on May 22, 1948 when it absorbed ITT Cable and Radio, Inc.—Puerto Rico, a company under common control, pursuant to authorization of the Commission dated April 17, 1948 (12 F.C.C. 2nd 679). The AAC&R financial report for 1948 includes the affairs of AAC&R for the entire year plus those of ITT&R to May 22, 1948.

2/ The miscellaneous physical property entry for investment, and the entries for miscellaneous income and miscellaneous deductions from income of All America Cables and Radio, Inc. have principally to do with operations allegedly outside the jurisdiction of the Commission, but are understood to be largely concerned with communications. Dividends per \$100 par or stated value not shown because equity capitalization as stated in the accounts is so unusual as to produce misleading results.

3/ Represents weighted average rate per \$100 par or stated value.

4/ This company participates in wide area telephone service but has not determined and so classified the relatively minor amounts of revenue received therefrom, and has instead classified them as telephone message toll revenues (line 110 above).

5/ Includes credit items "Telephone franchise requirements" and "Expenses charged construction."

6/ Includes only phantom circuit transposed aerial wire; miles of phantom circuit on wire in cable not available.

7/ Data were not reported for Non-Bell companies.

8/ Partly estimated.

9/ To avoid duplication 1,910,674 messages between Puerto Rico and the United States have been excluded as these messages are included in the number of calls shown for American Telephone & Telegraph Co. All America's portion of revenue for these messages amounted to \$4,335,539.

10/ All the base station transmitters used in Domestic Public Land Mobile Radio Service in one mobile service area are considered collectively as one base station.

11/ Data not tabulated for Non-Bell companies as reports for most of these companies are incomplete.

1/ The Southwestern States Telephone Co. merged into General Telephone Co. of the Southwest on January 10, 1968. The transaction was accounted for as a pooling of interests.
 2/ The Orange County Telephone Co. merged into General Telephone Co. of Upstate New York, Inc. on May 16, 1968. The transaction was accounted for as a pooling of interests.

3/ Includes telephone plant adjustment in amount of \$58,604.
 4/ Dividends per \$100 par or stated value not shown because equity capitalization as stated in the accounts is so unusual as to produce misleading results.

5/ Represents weighted average rate per \$100 par or stated value.
 6/ This company participates in wide area toll service but has not determined and so classified the relatively minor amounts of revenue received therefrom, and has instead

classified them as telephone message toll revenue (line 110 above).
 7/ Includes credit items, "Telephone franchise requirements" and "Expenses charged construction."

8/ Data not available.

9/ Data were not reported for Non-Bell companies.

10/ Partly estimated.

11/ Represents completed calls only.

12/ To avoid duplication 2,559,684 messages between Hawaii and the Continental United States have been excluded as these messages are included in the number of calls shown for American Telephone & Telegraph Co. The Hawaiian company's portion of revenue for these messages amounted to \$17,309,169.

13/ Excludes 304,220 messages between the Virgin Islands and the United States on which related revenues were \$1,365,227, an unascertained number of messages between Puerto Rico and the United States which were handled by ITT Communications, Inc.—Virgin Islands and included in the number of calls shown for American Telephone & Telegraph Co., and approximately 300,000 messages between Puerto Rico and the Virgin Islands which are included in the number of calls shown for All America Cables and Radio, Inc. The Virgin Island company's portion of revenue from all the foregoing messages amounted to \$5,783,749.

14/ All the base station transmitters used in Domestic Public Land Mobile Radio Service in one mobile service area are considered collectively as one base station.
 15/ Data not tabulated as reports for most Non-Bell companies are incomplete.

(1) Deficit or other reverse item.
 1/ This company participates in wide area toll service but has not determined and so classified the relatively minor amounts of revenue received therefrom, and has instead classified them as telephone message toll revenues (line 110 above).

2/ Includes credit items "Telephone franchise requirements" and "Expenses charged construction."

3/ Data not available.

4/ Data were not reported for Non-Bell companies.

5/ Partly estimated.

6/ All the base station transmitters used in Domestic Public Land Mobile Radio Service in one mobile service area are considered collectively as one base station.

7/ Data not tabulated as reports for most Non-Bell companies are incomplete.

Note.—Certain data pertaining to the carriers included in this table are unavailable. Where such is the case the space provided for the information has been left blank as distinguished from insertion of a dash which means that "None" was reported.

() Deficit or other reverse item.

1/ Includes offsetting credit in the amount of \$246,000 for charges made to income for investment tax credits applicable to plant in Minnesota. Other offsetting credits, in the amount of \$2,047,150, were made to deferred credits, item 53.

2/ Represents weighted average rate per \$100 par or stated value.

3/ This company participates in wide area toll service but has not determined and so classified the relatively minor amounts of revenue received therefrom, and has instead classified them as message toll revenues.

4/ Includes credit items "Telephone franchise requirements" and "Expenses charged construction."

5/ Partly estimated.

6/ All the base station transmitters used in Domestic Public Land Mobile Radio Service in one mobile service area are considered collectively as one base station.

() Deficit or other reverse item.

- 1/ This company uses liberalized depreciation in filing its Federal income tax return. It makes no advance provision in its accounts for the resulting tax differential.
 2/ Represents weighted average rate per \$100 par or stated value.
 3/ This company participates in wide area telephone service but has not determined and so classified the relatively minor amounts of revenue received therefrom, and has instead classified them as message toll revenues.
 4/ Includes credit items "Telephone franchise requirements" and "Expenses charged construction."
 5/ Partly estimated.
 6/ Represents completed calls only.
 7/ All the base station transmitters used in Domestic Public Land Mobile Radio Service in one mobile service area are considered collectively as one base station.

$\frac{1}{2}$ In April 1968 the following companies were merged into United Telephone Company of Ohio: Bucyrus Telephone Co., Eastern Telephone Service Co., Lima Telephone Co., Northwestern Telephone Co., Ohio Central Telephone Corp., Shelby Telephone Co., Van Wert Telephone Co. and Warren-United Telephone Co.

$\frac{2}{2}$ This company uses liberalized depreciation in filing its Federal income tax return. It makes no advance provision in its accounts for the resulting tax differential.

$\frac{3}{3}$ Represents weighted average rate per \$100 per or stated value.

$\frac{4}{4}$ Includes credit items "Telephone franchise requirements" and "Expenses charged construction."

$\frac{5}{5}$ Partly estimated.

$\frac{6}{6}$ All the base station transmitters used in Domestic Public Land Mobile Radio Service in one mobile service area are considered collectively as one base station.

Domestic and Overseas Telegraph Carriers

Table 18.--List of domestic and overseas telegraph carriers reporting to the Commission for the year ended December 31, 1968 whose reports were used in the statistical tabulations

Name of carrier	Headquarters	Type of carrier	Type of report filed 1/
Cable & Wireless/Western Union International, Inc.	San Juan, P.R.	Overseas	2/
ITT World Communications Inc.	New York, N.Y.	Overseas	Annual, monthly

Western Union International, Inc.	New York, N.Y.	Overseas	Annual, monthly
Western Union Telegraph Co.	New York, N.Y.	Domestic	Annual, monthly

Note.--In addition to the above companies, telephone carriers, for which detailed data are tabulated in Table 16, herein, have substantial amounts of telegraph revenues.

1/ Telegraph carriers subject to all of the common carrier provisions of the Communications Act of 1934, as amended, and whose annual operating revenues exceed \$50,000, are required to file annual reports. Those carriers whose annual operating revenues exceed \$250,000 are also required to file monthly reports of revenues and expenses.

2/ This company commenced operations July 19, 1968. Complete data concerning it are not available for inclusion in this volume. Its accounts, however, showed book cost of operated plant at December 31, 1968, of \$1,134,000 with an accumulated allowance for depreciation of \$125,000. C&W/WUI's operating revenues during the period of its operations in 1968 were at an approximate annual rate of \$1,000,000 and its expenses were such that it suffered a relatively substantial loss from operations during 1968.

() Deficit or other reverse item.

- 1/ Includes Western Union's ocean-cable system to September 30, 1963 at which time it was sold to Western Union International, Inc.
- 2/ The comparability of 1965 data for overseas telegraph carriers with data for previous years is affected by the fact that data regarding South American and most Caribbean operations of All America Cables and Radio, Inc. ceased to be reported in that year.
- 3/ Includes bills and accounts payable to affiliates in the nature of long-term advances from affiliates.
- 4/ Data for the Western Union Telegraph Co. for years 1933-1963 are not segregable between domestic-telegraph and overseas telegraph operations, but are included with domestic-telegraph.
- 5/ Western Union's capital stock was changed effective April 22, 1952 from class A stock without par value to common stock with a par value of \$10 per share. The capital stock account was reduced \$92,562,682, representing the excess of the stated value of the previously recorded capital stock over the par value of the presently issued common stock, by a transfer to "Other capital surplus."
- 6/ Compiled from responses to Telegraph Division Order No. 12, annual reports, and correspondence. Represents principally data as estimated by reporting carriers on basis of actual counts for test periods.
- 7/ The number of messages shown for years prior to 1944 include press messages on an equated basis. For 1944 and subsequent years figures include press messages on an unequated basis.
- 8/ Includes depreciation and operating taxes.
- 9/ Recorded provision for Federal income taxes takes entire company operations into consideration including manufacturing or other non-communication activity.
- 10/ These figures are affected by the \$18,126,223 loss on the sale of the Western Union cables system recorded as a cables loss and the \$8,250,000 tax reduction therefrom recorded as a domestic telegraph gain.
- 11/ 1933-1934 number of employees at the end of June, 1935-1945 number of employees at the end of December.
- 12/ Employment figure for 1955 includes an estimated 777 employees assigned to non-communication activities transferred by a carrier to a non-reporting affiliate prior to the reporting date in 1956.

Note.—The data in this table are as reported by the carriers and include some estimates.

- ^{1/} The data shown under Domestic messages for the overseas telegraph carriers relate to domestic classification messages handled by such carriers between United States on the one hand and Canada and Mexico on the other.
- ^{2/} Excludes that portion of transoceanic and marine messages which are transmitted between gateway points and points within the continental United States, Canada and Mexico and the domestic transmission revenues relating thereto. Accordingly, to avoid duplication the number of such messages has been excluded from the Grand total.
- ^{3/} Excludes 190,325 marine messages handled during the year with related revenues of \$260,256. Such amounts are included under public and government messages.
- ^{4/} Data relate to messages which did not originate in, terminate in, or transit the Continental United States.

Note.--For corresponding data regarding overseas communications services of telephone carriers see Table 14.

TV program transmission across the Atlantic Ocean began in mid 1965 and across the Pacific Ocean in late 1966. Beginning in late 1968 an Atlantic satellite was used for TV service in and out of Puerto Rico upon availability of the earth station there. Several U.S. carriers, including both telephone and telegraph, participate in offering this service, one at a time, on a rotation basis, except in Hawaii where the Hawaiian Telephone Co. handles all overseas TV. The TV usage and revenues of these carriers were:

Year	Chargeable Hours		Revenue
	Atlantic	Pacific	
1965	33	-	\$167,365
1966	75	3	457,828
1967	159	52	1,114,533
1968	292	149	2,170,000

Relatively minor amounts of revenue received from telephone operations by certain telegraph carriers are excluded from this table.

- 1/ Previous to August 31, 1964 was Mackay Radio and Telegraph Co. Data include revenues of Commercial Cable Co. to October 31, 1964 at which date its assets in U.S. were transferred to ITT World Communications Inc., Globe Wireless, Inc. to August 31, 1964 at which date it was merged with ITT World Communications Inc. and All America Cables and Radio, Inc. to December 31, 1964 at which date it discontinued filing reports as a telegraph carrier with the FCC. All America's assets in the U.S. were transferred to Mackay Radio and Telegraph Co. October 31, 1963 and its assets in Puerto Rico and the Virgin Islands were transferred to ITT World Communications Inc. June 30, 1965.
- 2/ Revenues from South American and certain Caribbean operations of All America Cables & Radio, Inc. are included in data shown for years prior to 1965 but were not reported to FCC in succeeding years.
- 3/ Name of company was changed from RCA Communications, Inc. September 20, 1968.
- 4/ Data shown include revenues of The Western Union Telegraph Company's ocean cable system to September 30, 1963 at which date it was purchased by Western Union International, Inc.

Note.—Data shown in this table are compiled from responses to the Commission's Rule 43.61 and represent all overseas message telegraph traffic which originated or terminated in the continental United States, excluding Alaska. Beginning with the year 1968 overseas telegraph message data as reported herein excludes data on messages which transited through the continental United States over the facilities of the telegraph carriers, which have been included in all prior years and therefore such years' data are not comparable. In 1968, the telegraph carriers reported that they handled some 71,500,000 transit telegraph message words, or about 10.9 per cent of the total overseas telegraph message words handled. The totals reported in this table differ from transoceanic traffic totals shown in Tables 21 and 31 for the reasons that (1) messages and words shown herein include overseas telegraph traffic handled by Western Union Telegraph Co. in the United States and exchanged with Canadian or Mexican carriers at the respective borders, which are reported in Tables 21 and 31 as "Domestic transmission of transoceanic messages"; (2) traffic of the French Cable Company is included herein, but excluded from Tables 21 and 31; and (3) traffic which did not originate or terminate in the continental United States has been omitted herein, but is included in Tables 21 and 31.

{ } Indicates revenue loss.

Note.—Data shown in this table compiled from responses to Commission Rule 43.61. Beginning with the year 1968 overseas telex data as reported herein excludes data on calls which transited through the continental United States over the facilities of the telegraph carriers, which have been included in all prior years and therefore such years' data are not comparable. In 1968, the telegraph carriers reported that they handled some 2,830,000 transit telex minutes, or about 3.5 percent of the total overseas telex minutes handled. The total telex revenues reported here differ from the amount of teleprinter exchange service (telex) revenues reported in Table 31 for the following reasons: (1) Payments to domestic carriers for extension haul within the continental United States, excluding Alaska, when their facilities are used for this purpose (beyond the U.S. gateways for the most part), included in this report are not included in the revenues in Table 31. Such payments are recorded as "Functions of revenues in the books of accounts of the carriers" and are reported in Table 31. (2) Certain overseas carriers furnish telex service at foreign points which do not touch the continental United States in transmission, the revenues for which are included in Table 31, but excluded herein; (3) The revenues from telex traffic transiting the continental United States are excluded from this table but included in Table 31.

() Indicates revenue loss.

^{1/} Index based on number of messages reported by the Bell companies only. Teletypewriter exchange service (TWX) was first offered by the Bell companies in 1931. Their 1968 revenues amounted to \$71,118,000. Western Union's domestic teletypewriter exchange service (Telex) began in 1958. Its 1968 revenues amounted to \$39,019,000.

^{2/} Western Union and Bell System private line telegraph revenues indexed above do not include revenues from relatively new but rapidly growing private line services such as TELPAK, data transmission, alternate telephone and teletypewriter, and alternate telephone and data. Bell System's TELPAK which commenced in February 1961, produced \$215,471,000 in 1968 and Western Union's TELPAK which commenced in June 1962, produced \$4,188,000 in 1968. Western Union received \$53,684,000 from data service, the larger proportion of which was for AUTODIN -- the automatic digital data network serving the Department of Defense.

Note.—Domestic and overseas telegraph carriers having annual operating revenues exceeding \$50,000 are required to file annual reports with the Commission.

- (1) Deficit or reverse item.
- 1/ Western Union Telegraph Co. had an estimated net reduction in Federal income tax expense of \$4,488,000 arising from the utilization, for income tax purposes, but not for accounting purposes, of a liberalized depreciation method recognized by Section 167 of the Internal Revenue Code of 1954. It also had an estimated increase in Federal income tax expense of \$75,000 arising from the use for tax purposes in prior years of five-year amortization authorized under Section 168 of the Internal Revenue Code of 1954. The accumulated net balance at December 31, 1968, of liberalized depreciation and five-year amortization income tax differentials accounted for on the "flow through" basis was \$49,831,000.
- 2/ The liberalized depreciation income tax differentials accumulated in the accounts of Western Union Telegraph Co. during the years 1954 through 1960 are being amortized in equal amounts over ten years beginning January 1, 1962, to provision for Federal income taxes. ITT World Communications Inc. had for the year 1968 a net reduction in Federal income tax expense of \$1,045,000 arising from the utilization for tax purposes of liberalized depreciation which was accounted for on the "flow through" basis. The accumulated net amount of liberalized depreciation income tax differentials accounted for on the "flow through" basis for the years 1961 to 1968, inclusive, was \$2,979,000. Investment tax credits under the Revenue Act of 1962 of approximately \$5,600,000 were not utilized by Western Union Telegraph Co. due to the absence of tax liability for 1968. The unused investment tax credit carryover, available for tax reduction in subsequent years, is estimated at \$11,500,000.
- 3/ ITT World Communications Inc. realized during 1968 investment credits in the amount of \$839,000. They were given immediate total flow through treatment.
- 4/ Press Wireless reported that no investment credits were realized in 1968.
- 5/ Represents principally revenues from messages which did not originate in, terminate in, or transit the continental United States.
- 6/ Includes territorial revenues and possessions of the United States except the Canal Zone.
- 7/ Includes domestic classification messages (primarily Canadian and Mexican) handled by the international carriers.
- 8/ Includes the domestic transmission of marine messages.
- 9/ Includes (1) telegraph traffic which originated in, terminated in, or transited the continental United States and its possessions, and (2) traffic handled between points located outside the continental United States and its possessions.
- 10/ Excludes the domestic transmission of marine messages.

() Deficit or reverse item.

- 1/ RCA Global Communications, Inc. had a net reduction in Federal income tax expense of approximately \$1,839,000, arising from the utilization for income tax purposes, but not for accounting purposes of a liberalized depreciation method recognized by Section 167 of the Internal Revenue Code of 1954. The accumulated amount of liberalized depreciation income tax differentials accounted for since 1957 on the "flow through" basis was \$8,371,000.
- 2/ Western Union International, Inc. had a net reduction in Federal income tax expense of \$552,000 arising from the utilization for income tax purposes, but not for accounting purposes, of a liberalized depreciation method recognized by Section 167 of the Internal Revenue Code of 1954. The accumulated net amount of liberalized depreciation income tax differentials accounted for on the "flow through" basis since the company was formed October 1, 1963, was \$1,453,000.
- 3/ RCA Global Communications, Inc. realized during 1968 investment credits in the amount of \$825,000. They were given immediate total flow through treatment.
- 4/ Tropical Radio Telegraph Co. realized during 1968 investment credits in the amount of \$35,251. They were given immediate total flow through treatment.
- 5/ Western Union International, Inc. realized \$258,000 investment tax credits in 1968 which were given immediate total flow through treatment. The company has unused investment tax credits about which there is some question as to their allowability.
- 6/ Represents principally revenues from messages which did not originate in, terminate in, or transit the continental United States.
- 7/ The two RCA channels in the U.S. - Jamaica-Panama cable are reported by Tropical as being the northern halves of two of its three U.S. - Panama channels.
- 8/ Includes territories and possessions of the United States except the Canal Zone.
- 9/ Includes domestic classification messages (primarily Canadian and Mexican) handled by the international carriers.
- 10/ Includes (1) telegraph traffic which originated in, terminated in, or transited the continental United States and its possessions, and (2) traffic handled between points located outside the continental United States and its possessions.

Note.—Notes to financial statements as published by Comsat have been omitted. In brief, partial summary, however, it is pointed out in these notes that the Early Bird satellite (Intelsat I), along with a second satellite of this series which was never launched, were depreciated over 27 months on a straight-line-facility-unit basis and were fully depreciated at September 30, 1967. The first of the Intelsat II series of satellites was launched October 26, 1966 but did not achieve synchronous orbit as intended. Comsat's share of the cost (approximately \$4.5 million) of this first satellite of the Intelsat II series, adjusted for minor operating costs and revenues during certain limited operation, was charged to satellite system development costs and amortization commenced May 1, 1967 (date of commencement of full commercial operation and of adoption of conventional accounting) on straight line basis over a period of 36 months although amortization of the remainder of satellite system development costs commenced the same date to extend over a period of 10 years on the reverse sum-of-the-year-digits method. The second, third and fourth satellites of the Intelsat II series were launched successfully during 1967 and are being depreciated on the same unit basis as was adopted for Intelsat I except that the period of depreciation is 36 months. Depreciation commences from the respective dates of operation. A fifth satellite of the Intelsat II series was purchased but never launched. It is being depreciated as an on-ground spare over 33 months from March 1, 1968 which is the date of its delivery to Comsat. Thirty-three months was considered by Comsat as the remaining life of the Intelsat II program as of March 1, 1968. The first satellite of the Intelsat III series was the subject of an unsuccessful launch attempt on September 18, 1968. The second satellite of the Intelsat III series was launched successfully on December 18, 1968 and was placed in commercial operation January 3, 1969 at which date depreciation of both these satellites commenced to extend over 60 months. The costs of both these satellites were still classified as construction in progress at December 31, 1968.

The fixed earth stations are being depreciated over an average of 11 years, and the transportables over 7 years. Half interests in each of the earth stations were sold to carrier-users of Comsat service as of September 30, 1967 and the costs of additions to earth stations and additional stations since that date have been borne by co-owners to the extent of one-half. During 1968, however, half interests in transportable earth stations which had been sold in 1967 were repurchased by Comsat and devoted to uses other than carriage of traffic. Research and development costs are being capitalized, and each six-months accumulation is being amortized on a straight line basis, over a period of 60 months, beginning with the first day of the following semi-annual period. Interest during construction was accrued at a rate of 5% per annum prior to May 1, 1967 and at 7% per annum thereafter with the latter rate being subject to possible change retroactively to May 1, 1967, depending upon certain actions by F.C.C.

Certain costs, principally satellite system development and research and development, were capitalized in the accounts but treated as reductions in taxable income for income tax purposes. This tax treatment has resulted in no taxable income since Comsat commenced business through 1968. The tax reductions have, however, been reflected by establishment of a provision for deferred income taxes offset by the tax values (positive or negative) assignable to investment income and operating income or losses, respectively. Comsat had at December 31, 1968 unused investment credits of approximately \$1,450,000 and tax loss carry-forwards of approximately \$7,200,000.

Sources: Annual Reports to Shareholders and annual reports filed with F.C.C.

1/ Includes television revenues of \$1,226,000 and \$728,000 for 1968 and 1967, respectively. The balance in each year is principally from leases of regular voice grade channels for temporary periods. In 1968 there was an additional \$261,000 of television revenue not so recorded in the accounts but offset against expenses since they were received through the use of new earth stations not yet officially in service.

2/ Bulk sale of earth station and satellite services sold to NASA for its Apollo program under a three-year contract expiring September 30, 1969. This contract with no service interruption credits and no "give-ups" had a revenue value of \$8,958,000 annually. Due to delays in getting satellites in service the program did not reach its full two-ocean scope until April 1967.

3/ Thirty circuits case. Comsat was authorized to serve DCA directly while the matter of the allocation of the circuits to the regular carriers was being resolved. Comsat service commenced in April 1967 and ended in April 1968.

4/ Comsat receives fees for acting as manager of Intelsat and since October 1, 1967 when half interests in its earth stations were sold to its common carrier customers has also received management fees from such co-owners.

5/ Comsat dismantled its transportable earth station at Brewster Flat, Washington and reassembled it in the Philippines where it was leased to the Philippines satellite communications operator pending completion of its own fixed earth station. Lease rentals commenced in April 1967 and ended in June 1968.

6/ Commencing in October 1968 Comsat leased its transportable earth stations in Hawaii and Maine to Intelsat to be used for satellite tracking, telemetry and command (IT&C) purposes (see 15 F.C.C. 2d 65 and 382). Comsat records as revenues its 47% of the total amounts due from others.

7/ Operations expenses and depreciation of earth stations decreased in 1968 as compared to 1967 due to the fact that one half of the expenses of operating earth stations and the depreciation thereof was borne by the co-owners (50%) of the earth stations commencing October 1, 1967. The decrease in operations and depreciation expenses is offset by an increase in earth station use charges since the co-owners are compensated by Comsat through this means.

Table 33.—Income statement of Communications Satellite Corporation (Comsat)
for the years ended December 31, 1968 and December 31, 1967—Continued

- 8/ General communication expense of \$53,218 in 1968 was separately reported because it was an insurance expense not allocable to any department of Comsat.
- 9/ Comsat in 1967 and 1968 used well in excess of one half of all satellite capacity sold because (a) the U.S. is the only country that has satellite communications both originating and terminating within the country (mainland - Hawaii) and (b) the NASA Apollo program package includes both up and down satellite links.
- 10/ Comsat uses the Mill Village earth station of COTC and the latter uses the Andover earth station of Comsat. Mill Village was used considerably more than Andover in this exchange of services in 1967 and 1968.
- 11/ In addition to the Hawaii and Maine transportable earth stations of Comsat, Intelsat uses an Italian earth station for TT&C purposes. \$128,350 was Comsat's 53% share of the rentals of this earth station in 1968.
- 12/ \$139,880 in 1968 for use of facilities of other Intelsat members represents the charges to Comsat for one-time uses of various facilities in foreign countries.
- 13/ The Intelsat II satellites were purchased under a contract that provided for substantial lump-sum payments as each satellite was launched. These payments were capitalized. There were nominal monthly payments for the next 17 months of successful operation of each satellite. These payments were not separately classified in expenses. Beginning with the 19th month each satellite still operating called for a larger monthly payment. Such payments commenced in 1968.
- 14/ Depreciation expense on satellites was less in 1968 than in 1967 due to the fact that the original Early Bird satellite and its never-used on-ground spare became fully depreciated September 30, 1967 and other satellites with longer lives assumed for depreciation purposes (3 years vs. 27 months) became depreciable at various times in 1967 and continued so in 1968 but no new satellites became depreciable in 1968.
- 15/ These are calculated income tax values since, for reasons set forth in the note to Table 32, Comsat had no actual liability for payment of income taxes on its 1967 and 1968 business activities.
- 16/ Reflects only District of Columbia annual report and personal property taxes. Other taxes are included under operating expense classifications.

Holding Companies and Intercorporate Relations

Table 35.—Inter-associate relations of communications carriers and controlling companies, December 31, 1948

Note.—Carriers controlled by other companies are indicated by indentations from the margin. For the purpose of this table, control is defined as the ownership of more than 50% of a carrier's common stock. Information shown is principally from annual reports filed with the Commission. In some instances data were obtained from unofficial sources.
